**Key:**

Black - nav

Orange – main

Blue – header

Red – section
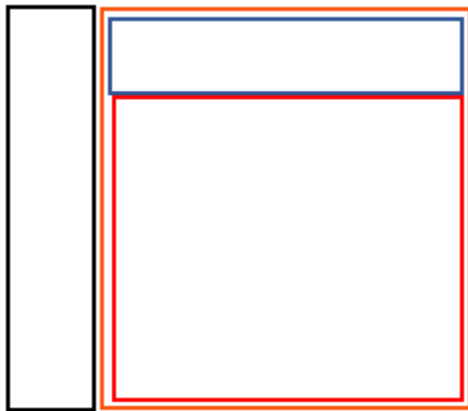

Yellow – article

Green – aside

Purple – footer

Note: *you could use different semantic tags, place them differently, or even use div tags with classes. This is just one method to developing the layout.*

Breaking down the page layout, working from the outside in:

The outer containers are nav and main:

Inside the main container, we place header and section:

Inside section, we place article, footer, and aside:
